

Gate Opener System Comparison Guide

FEATURE OR CAPABILITY	GHOST CONTROLS® ADVANTAGE	COMPARE US TO THE COMPETITION
UL325 Certification	UL325 7th Edition Standard (current edition in effect August 1, 2018)	
Speed	~15 seconds to 90 degree opening (times may vary)	
Warranty	LIFETIME gear motor warranty	
Price of Ownership	MSRP beginning at \$449	
Photo Eyes	Not required with SafeForce® in most installations, can be added if desired	
Keep gate open for long periods of time	PartyMode® can be enabled from keypad or remote and will temporarily disable auto-close until PartyMode® is disabled	
Allow anyone to enter gate with one touch on keypad	PartyMode Secure™ can be enabled from keypad and will allow anyone to open gate by pressing any number key on the keypad but will then still close gate automatically if auto-close was enabled	
Vacation Mode to only allow entry via a secure code in keypad	VacationMode is enabled from keypad and will prevent unauthorized access via remote but confirm that remote is still “learned” into system	
Automatic Gate Lock	Patented ZombieLock® with feedback will not damage your gate because gate opener will not move until lock has disengaged	
Long Range Remote	Narrow band transmitters and receivers with GhostCode® allow greater range (up to 400 feet) with remote transmitters to open or close your gate	
Solar Capability	Compatible	
Installation Skills Required	Easiest system available to install onto tubular farm gates, DIY with no welding required, can be completed by most people within an afternoon
